Dear Mr. or Mrs.,

I am writing in response to your advertisement posted with Indeed job finder. Would you please consider me for the entry-level position as a copper and fiber optics installer? I believe that my experience as a tactical field wireman in the United States Marine Corps, along with my on the job experience in Afghanistan installing/terminating copper and fiber optic cable, qualify me for this position

My field experience has given me a strong background in copper and fiber optic installation. I concentrated on the termination of fiber optics into black boxes and dressing copper cat-5 into black boxes. As a Non-Commissioned Officer in the Marine Corps I supervised a team of 3 marines in completely installing phone, Internet, and fiber optics in 7 different building. These buildings were part of a command and control center that was a critical part of countless operation in Afghanistan. I was the assistant chief in charge of trouble shooting and fiber optic installation.

While working as a tactical field wireman/fiber optic installer in Afghanistan, I applied my skills as a leader to take charge of projects that needed to get done, I used my experience in attention to detail, timeliness, and leadership to finish projects in a timely manner and to proper dress and check all ports and wires were properly installed.

My résumé provides further information about my education and work experience. Hiring personal at Eco-Staff, I would enjoy the opportunity to meet with you to discuss my qualifications and résumé. You can reach me at (817) 629-0990 or at raulsalvador@my.unt.edu.

Sincerely,

Raul Salvador
